**Low Weight Births - 2007:** Alabama Department of Public Health, Center for Health Statistics, Special query of the 2006 Birth Statistics File. (Births weighing less than 2,500 grams or 5 pounds and 8 ounces are defined as being of low weight.)

**Births to Teenagers (Age 10-19) - 2007:** Alabama Department of Public Health, Center for Health Statistics, Special query of the 2006 Birth Statistics File.

**Births With Less Than Adequate Prenatal Care - 2007:** Alabama Department of Public Health, Center for Health Statistics, Special query of the 2006 Birth Statistics File. (The Kotelchuck Index is used in determining adequacy of prenatal care. This index primarily considers the date when prenatal care was begun and the number of visits in determining adequacy.)

**Births With Tobacco Use During Pregnancy - 2007:** Alabama Department of Public Health, Center for Health Statistics, Special query of the 2006 Birth Statistics File.

**Births Occurring Outside Mother's County of Residence - 2007:** Alabama Department of Public Health, Center for Health Statistics, Special query of the 2006 Birth Statistics File.

(This indicator was included because of the serious decline in the number of rural hospitals where obstetrics are performed and the natural relationship between women receiving adequate prenatal care and the presence of obstetrical care in the county.)

**Births to Undereducated Women - 2007:** Alabama Department of Public Health, Center for Health Statistics, Special query of the 2006 Birth Statistics File. (Women are considered to be “undereducated” when their years of education is at least two years less than what would be expected for someone of their age.)

**Age 65+ With "Home Bound" Disability - 2000:** U.S. Census Bureau, American FactFinder, Census 2000 Summary File 3 (SF 3) Sample Data, Table P41 – Age by Types of Disability for the Civilian Noninstitutionalized Population 5 Years and Over With Disabilities.

**Age 25+ With Less Than High School Education - 2000:** U.S. Census Bureau, American FactFinder, Census 2000 Summary File 3 (SF 3) Sample Data, Table P37 – Sex by Educational Attainment for the Population 25 Years and Over.

**Accidental Deaths Occurring Outside of a Health Care Facility - (2005-2007):** Alabama Department of Public Health, Center for Health Statistics, Special query of the 2005, 2006, and 2007 Mortality Statistics File. (This indicator was used in the place of an “emergency medical services emergency ambulance runs” data base. While there is such a data base maintained within the Alabama Department of Public Health, reporting to this data base is not complete and could produce confusing findings. The provision of adequate emergency medical service continues to be a serious issue in most rural Alabama counties.)

**Life Expectancy at Birth - 2007:** Alabama Department of Public Health, Center for Health Statistics, County Health Profiles – 2007. <http://www.adph.org/healthstats/>

**Sexually Transmitted Disease Cases - 2008:** Alabama Department of Public Health, Division of STD Prevention and Control, Statistics, County Totals – 2008. <http://www.adph.org/STD/>

**Cumulative HIV Cases as of 12/31/2008:** Alabama Department of Public Health, Division of HIV/AIDS Prevention and Control, Statistics, Public Health Area (January – December 2008). <http://www.adph.org/aids/>  
(National data for the cumulative number of HIV cases as of December 31, 2008 is not comparable due to the fact that not all states report this information to the Centers for Disease Control and Prevention and those that are reporting initiated this reporting at varying times.)
